

Project Engineer @Tempe, AZ ~ \$120-\$140K+

Play a key role in the future of Electric Vehicles (EV). This Engineer drives project timetables & programs in EV charging solutions across many teams for a global leader.

Our client designs, maintains, manages, & operates a large network of EV charging stations across the world. Their comprehensive set of hardware, software, and mobile solutions meet every evolving charging need.

As EV becomes reality – put your PM skills to work.

This role reports to the Dir Prod Development on a dynamic global team. Skills in Taiwanese, Mandarin and/or languages spoken in India and China are highly valued. **H1B Sponsorship is available for key talent.**

The Project Engineer works closely with key customers, partners, and vendors to define, understand and communicate project scope, deliverables, track project progress, support technical sales, and works with cross functional teams to deliver projects on time.

This position requires a history of success in project management, engineering & sales.

Project Management - Works closely w customers, suppliers/vendors/partners, & team to track project health.

- ⊖ Demonstrate technical expertise in project management including scheduling, tracking, task assignment, status reports, facilitate effective problem solving to stay ahead of the timeline.

Technical Sales – Learns and becomes expert in products.

- ⊖ Provides support answering technical questions related to sales and vendor quotes.
- ⊖ Facilitates effective “selling” of new & innovative concepts.

Product Development - Follow projects from prototype build & verification testing through production launch.

- ⊖ Plan, schedule, & control projects to achieve product deliverables for quality, reliability, & performance.

Customer Centric & Vendor Development - customer facing with humility building effective relationships.

- ⊖ Bridge the communications between the customer, vendor & internal teams to achieve project goals.

Bachelor's or Master's degree in project management, engineering, international business or similar areas

- ⊖ Minimum five (5) years of industry experience in project management
- ⊖ Minimum three (3) years of experience in launching products to the market
- ⊖ Project management certifications are a plus
- ⊖ Industry experience in technical sales, consumer electronics, EV or automotive products is a plus
- ⊖ Working directly with customers & overseas vendors based in Asia and Europe
- ⊖ Understands technical engineering principles and systems w a working knowledge of 3D CAD design software (Solidworks/Catia preferred), 2D engineering drawing w JIRA, PLM, Microsoft Project, etc. PM apps a plus.
- ⊖ Demonstrated ability to make good decisions even in scenarios with limited information
 - Strong oral, written and listening communication skills
 - Combined ability to work independently and interact with people at all levels of responsibility
 - Ability to be self-motivated and exhibit a high degree of professionalism

Will Sponsor for H1 B if currently Authorized to work in the United States

Comprehensive Benefits Package Includes: Medical, dental, & vision plans + 401(k)

- ⊖ Paid Time Off (PTO), + 13 Holidays, Optional life & supplemental insurance, Relocation Assistance
