SYSTEM OPERATOR Fairfield, CA ~ \$120 - \$140K + Benes Global Ops

Join a Global Team changing the Utility landscape bringing sustainable, reliable power to cities, utilities & corporate clients. Responsible for the safe operation of all utility assets including Power Plants, Transmission, Distribution, Substation assets as well as non-utility: "behind the meter" assets, DERs, BESS, & EV & storage infrastructure across NA and globally. Coordinate and build capacities across departments to assure Vigilance, Agility and Resilience (VAR) in operations in real-time, tactically & strategically.

Direct power system dispatching to comply with daily forecasts, oversee clearance processing and operations of generation plants, lines, substation facilities, grid infrastructure, and related systems and services.

Directly responsible for:

- ⊖ Assure company generation & transmission operations function to assure safe & reliable electric service to prevent power outages, in accordance with mandatory Federal Energy Regulatory Commission (FERC), North American Electric Reliability Corporation (NERC) and Western Electricity Coordinating Council (WECC) grid operations requirements & regulations.
- ⊖ Balance real time & planned electricity operating system parameters including voltages, line & equipment loading & supply availability in coordination with associated RRO & interconnecting utilities.
- ⊖ Monitor multiple switching & distribution operations centers showing operating conditions of lines & equipment across the system, adjusting as conditions warrant.
- ⊖ Coordinate with Substation operations & field personnel to de-energize malfunctioning circuits or adjust switches to ensure safety of all crews, the public & safe and reliable operation of electrical systems.

Key Responsibilities:

- ⊖ Assure continual operations of Gen, Transmission & Distribution facilities @ all voltage levels (HV, MV & LV).
- ⊖ Meet the needs of new connections applications & power increases required by commercial clients.
- ⊖ Maintain safe and environmentally sustainable operation of power plants & associated networks.
- ⊖ Monitor the implementation of safety procedures through the safety section under his/her jurisdiction.
- ⊖ Execute economic dispatch of generation in compliance with regulatory standards, customer needs & the market as a whole (tariff differentiation).
- ⊖ Optimize the operation of power plant production while optimizing business results.

- θ Direct the generation programming and dispatching to comply with daily demand or availability forecasts.
- θ Optimize network configuration with regard to quality, efficiency & cost.
- θ Provide strategic guidance in planning & development of grid assets & interconnection to ensure generation, transmission & distribution systems can absorb or deliver energy as forecasted.
- θ Coordinate the development of the Network Automation & Management Information Systems with IT to assure nimble, agile adaptation to the needs of the business & related processes.
- θ Manage quality demand supply through well-established utility standards (standard voltage/VAR limits & regulation, frequency, power factor, etc.).
- θ Implement processes & procedures to assure compliance with regulatory rules minimizing the impact to the company while making suggestions to continuously improve and streamline operations.
- θ Coordinate with the appropriate units in the Energy Development Company to standardize materials, equipment & facilities ensuring that they meet the highest standards of agility, quality & efficiency.

Behavioral Attributes:

- θ Strong analytical skills able to communicate with & interface with customers, desires & technical requirements.
- θ Maintain rapport & good communications with external customers, partners, and suppliers.
- θ Team player with excellent team communication skills and knowledge sharing ability
- θ Lead & act a change agent with high energy & drive for innovation.
- θ Build & sustain strong connection to the community and desire to help others

Minimum Educational & Experience Requirements:

NERC RC w 3-5+ years working experience in Operations.

Desire to be part of growing something bigger and changing the face & heart of system operations.

COMPREHENSIVE COMPENSATION & BENEFITS PACKAGE
